

THE LEGEND OF THE ROCKET RACER

(second draft: 18/02/99)

The legends of LEGO World are full of stories about the Rocket Racer - the fastest LEGO Racer of them all. Just a kid in a T-shirt and jeans, he came out of nowhere to take on the greatest LEGO Racers of his day. Everyone laughed when he told them his name - but the laughing stopped when he lifted the cup and took the title of LEGO World Champion of Champions! No one was faster. No one was cooler. And, since that time, no one has ever come close to beating him.

But Rocket Racer's got a problem.

He's bored!

Being the best of the best is no fun when there's no one left to challenge you, so the search is on to find a LEGO Racer brave enough and fast enough to challenge Rocket Racer for his title. Veronica Voltage, super-smart granddaughter of Professor Voltage, LEGO World's greatest scientific genius and inventor of the Duplicator Ray, created a Warp Gate to transport the greatest racers from every corner of the LEGO universe across time and space to the toughest race tracks in history - from the scorching heat of the desert to the airless danger of the Magma Moon!

The challenge has been issued. The challengers are travelling across the vast emptiness of space and the numberless eons of time to compete for the title of LEGO World Champion of Champions. You can join them - if you dare!

Desert Adventure Dragway, Amazon Adventure Alley, Dark Forest Dash, Imperial Grand Prix, Ice Planet Path, Magma Moon Marathon, Pirate Skull Pass, Royal Knights Raceway and Tribal Island Trail...they're just some of the tracks waiting to test the speed and skill of the LEGO Racer who wants to take on the ultimate challenge: to race against the Rocket Racer himself!

Along the way, you'll race against the adventurous Johnny Thunder and his team of intrepid archeologists, the treacherous Baron von Barron and his sidekick Sam Sinister, the villainous Black Knight and the space-faring Explorians. Power-Ups, Boosters, hidden short-cuts - you'll need them all to finish each track ahead of the rest. Every track is full of mystery and adventure, but the greatest mystery of all is...

Can you win them all?

To be a LEGO Racer is tough, but to beat the Rocket Racer is even tougher! Your first stop is the garage, where you can build your own LEGO Racer and try it out on a practice track. Fine tune it until it handles just the way you want! After every race you can come back to the garage to modify your car. What will you need to win the next race? More speed? Better steering? A cooler paint job? Customise your racer, take it for a spin on the practice track, and then drive it through the garage doors to do battle on the next awesome course!

If you can win every race, you'll think you're pretty cool - but, thanks to Veronica Voltage, you'll only be halfway there! After tinkering in the lab with her grandfather's Duplicator Ray, she created copies of every track in the LEGO Racers Challenge - and then flipped them! Every death-defying right turn is now a left turn, every switchback now runs in reverse! Your eyes aren't deceiving you: everything looks the same - but different! To be a LEGO Racer you've got to be fast - but you've got to be smart, too! Have you got what it takes?

If you think you need some time to practice, to hone your racing skills, then Veronica Voltage has got a treat in store for you! The Time Trial Track exists in a pocket dimension created by Veronica's ultra high-tech Warp Gate technology. Race against the clock to improve your skills and test your car to its limits, but watch out...you're not alone! Veronica's not just a super-smart scientific genius - she's a pretty mean LEGO Racer herself! You may be able to beat the clock, but can you beat Veronica to the finish?

And, if you beat Veronica, the time Trial Track has one more challenge to offer - the Ghost Racer! When you line up to race against the clock, you'll find yourself racing against a Time Ghost of yourself, following

the path you took the last time you raced this track! Spooky? You bet!

If you can come first on every track, then do the same on every one of the mind-boggling mirrored tracks, the last Warp Gate will take you to the Rocket Racer's home world, to the track on which he won the Championship. If you can beat him there, LEGO World will have a new Champion of Champions - YOU!

But remember: If you want to race the best, first you've got beat the rest! Build your own LEGO Racer and get on the Start Line. The Rocket Racer's waiting!
